

ROBOT4 MANUFACTURING

BUSINESS MEETINGS

DEDICATED TO INDUSTRIAL ROBOTICS

5th edition

**6-7
NOVEMBER 2024**

*La Roche-sur-Yon
France*

INDUSTRIAL PARTNERS

FINANCIAL PARTNERS

TECHNICAL PARTNERS

CO-ORGANIZED BY

WHAT IS R4M?

2 days of preprogrammed business meetings between users of industrial robotics and solutions providers offering their capabilities and services.

Robot4Manufacturing business convention is a place for meetings and exchanges between professionals involved with industrial robotisation through 2 days of preprogrammed BtoB meetings. It also allows each attendee to deepen its industrial robotics knowledge through specialized workshops and conferences (state of the art, latest technologies).

PARTICIPANTS PROFIL

BUYER

You are interested in **industrial automation solutions** in the following areas:

- Aeronautics
- Food processing
- Furnishing
- Automobile
- Construction industry
- Chemistry
- Electronics
- Computing
- Mechanics
- Metallurgy - Steel Industry
- Nautical
- Pharmacy - Cosmetology
- Plastics processing
- Textile
- Transport - Logistics

EXHIBITOR

- Manufacturers
- Integrators
- Equipments
- Auxiliary tools
- Software suppliers
- Studies and services
- Training
- Maintenance
- ...

HOW ARE BUSINES MEETINGS MADE?

1

You fill in your registration form by precisely describing your proposed **skills/services** and/or your needs/projects.

2

You **consult the catalogue** of the skills and projects needs expressed by participants. You **submit and receive appointment requests**. Only validated appointments by both parties are organized to optimize the relevance of your contacts.

3

You receive a **customised schedule** with your choice of meetings

4

You meet your interlocutors through **40-minute interviews**.

Alongside local authorities and businesses, Oryon is driving the economic dynamic of the Roche-sur-Yon Agglomeration in the Vendée region.

The objective is to make the region more attractive to businesses and investors by capitalising on its assets and creating the conditions for sustainable economic development

proxinnov

With more than 200 companies in its network, PROXINNOV is the technical center dedicated to industrial robotics in the Pays de la Loire. PROXINNOV's mission is to provide neutral support to companies in their robotization projects, through various actions.

- The industrial study, by conducting the pre-project phase to remove technical, economic and human barriers.
- Experimentation, by verifying the viability of the concepts and ensuring that the chosen solution is adapted to the needs of the industrialist.
- Training, allowing the transmission of knowledge and the preparation of teams.
- Knowledge transfer, by federating robotics players and boosting their visibility.

FOCUS ON THE PAYS DE LA LOIRE

The Pays de la Loire region has many sectors of excellence, including agribusiness, aeronautics, shipbuilding, metallurgy, textiles and leather goods. These sectors are supported by a dense and varied entrepreneurial fabric, including major contractors (Airbus, Chantiers de l'Atlantique, Naval Group, Manitou, GE) as well as small and medium-sized enterprises (SMEs). These industrial companies contribute to the development and competitiveness of the region.

In this context, the Pays de la Loire Region is deploying an ambitious industrial strategy based on excellence and innovation. This relies on a network, unique in France, of six Technocampuses, including the Robotics and Cobotics Technocampus in La Roche-sur-Yon, run by Proxinnov. These platforms dedicated to production technologies provide local companies with a 360° vision of innovation and support them in their evolution towards the industry of the future.

The Pays de la Loire Region supports R4M as part of this strategy.
